

AMEER ALI KHAN

Senior Software Engineer | Lead Software Developer

+91-7022960767

techie.akhan@gmail.com

<https://www.linkedin.com/in/ameer-ali-khan/>

Accomplished IT professional with over 8+ years of experience designing and delivering scalable, high-performance applications using Java, SpringBoot, Python, Data Structure and Algorithm and microservices architecture. Targeting opportunities in Application Development Lifecycle, aiming to utilize a wealth of experience in driving impactful projects across diverse technology landscapes.

PROFILE SUMMARY

- **Cloud & Infrastructure:** Expertise in managing and deploying resilient cloud-native solutions on Azure, integrating Kubernetes for container orchestration and scalable infrastructure management.
- **System Architecture & Optimization:** Proven capability to architect efficient systems and optimize legacy platforms by implementing modern protocols like Apple's Declarative Device Management.
- **Data Management:** Skilled in SQL and Neo4j graph databases, enabling complex data modeling and efficient query management to support enterprise-level applications.
- **Leadership & Collaboration:** Exhibited leadership in fostering team collaboration, driving innovation, and aligning cross-functional teams towards shared project goals.
- **Performance Improvement:** Delivered significant operational gains by reducing processing times drastically, enhancing system throughput and customer satisfaction.
- **Agile & DevOps Practices:** Strong advocate of Agile methodologies and DevOps, streamlining workflows to accelerate delivery cycles and improve software quality.
- **Continuous Learning:** Committed to ongoing professional growth, actively pursuing certifications and staying updated with emerging technologies to maintain a competitive edge.

CORE COMPETENCIES

Cloud Infrastructure Management

Software Development Life Cycle

Agile Methodologies

System Architecture Design

Performance Optimization

Microservices Architecture

Data Pipeline Development

RESTful API Design

Device Management Solutions

Team Management & Collaboration

EDUCATION

2016: Bachelor Of Technology, Information Technology, from Sikkim Manipal Institute of Technology, India

TECHNICAL SKILLS

Java 8+, Spring Cloud, Spring Boot, Hybernate, SQL, Azure SQL, Postgres SQL, Mongo db, Kafka, IBM MQ, RabbitMQ, Data Structures, Algorithms, Kubernetes, Docker, AWS S3, Elastic search, Redis cache, Dynatrace, Grafana, A/B Split Testing, Github Copilot

CAREER TIMELINE

Associate Software Engineer

Harman International Pvt. Ltd., Bengaluru, India | Aug 2017 – Mar 2019

Software Engineer

Sasken Technologies, Bengaluru, India | Mar 2019 – Jul 2019

Software Engineer

Nagravision Pvt. Ltd., Bengaluru, India | Nov 2019 – Dec 2021

Software Engineer 3

Walmart, Bengaluru, India | Dec 2021 – July 2024

Senior Software Engineer

Ivanti India Development Center, Bengaluru, India | July 2024 – Present

WORK EXPERIENCE

Senior Software Engineer

Ivanti India Development Center, Bengaluru, India | July 2024 – Present

Lead back-end development for Ivanti's Apple device management team within the enterprise MDM platform (MobileIron), specializing in macOS, iOS, and iPadOS device management.

- Architected and spearheaded integration of Apple's Declarative Device Management (DDM) protocol, transitioning from legacy XML-based MDM to a modern, JSON-driven, policy-centric framework.
- Developed scalable, secure microservices in Java (Spring Boot) supporting real-time device enrollment, configuration, and compliance enforcement.
- **Designed and implemented algorithm for policies management** to successfully push policy to device after subsequent update.
- Engineered and optimized PostgreSQL and Elasticsearch-based data pipelines and search functionalities, enabling rapid device inventory and policy status reporting.
- Collaborated closely with Apple for comprehensive documentation alignment and device testing to ensure full protocol support and backward compatibility.
- Delivered robust RESTful APIs and asynchronous workflow for DDM state publishing, manifest distribution, and subscription management.

Software Engineer 3

Walmart, Bengaluru, India | Dec 2021 – July 2024

Led end-to-end development of the Manual Grocery Distribution Center Solution (One Atlas), scaling to process 20 million cases daily across Azure cloud regions.

- Directed enhancements to the Order Fulfillment Service, implemented real-time item picking to optimize inventory accuracy and shipping workflow across multiple stores.
- Achieved operational efficiency gains by cutting order download and release times from over 60 minutes to under 7 minutes, accelerating fulfillment velocity.
- Successfully onboarded 10 distribution centers, devising scalable roll-out strategies targeting 48 centers within a year.
- Collaborated with Inventory, Replenishment, and Audit teams to integrate auto-recovery mechanisms, ensured fault-tolerant operations.
- Designed and implemented a Central Configuration system reducing update times from 48 hours to instantaneous.
- Led integration of the Order Fulfillment service with Witron automated warehouses and critical back-end systems.
- Mentored junior engineers, accelerated delivery timelines and promoted best practices.
- Authored comprehensive High-Level and Low-Level Design documentation for key features including Multi-Slot and Real-Time Picking.
- Design and deployed robust **order allocation algorithm** using pro-rata methodology to ensure precise and equitable distribution of limited inventory based on picked qty.
- Technologies used: Spring Boot, Java, SQL, Kafka, Kubernetes, Jenkins, Splunk, Dynatrace, Grafana.

Software Engineer

Nagravision Pvt. Ltd., Bengaluru, India | Nov 2019 – Dec 2021

Contributed to a major OTT/IPTV platform, enhancing content management and delivery systems.

- Delivered robust services for large-scale XML data ingestion and live/VOD content management, ensured seamless streaming experiences.
- Played a key role in transitioning from a monolithic to microservices architecture via Media Aggregator Service implementation, enhancing scalability and agility.
- Built a polling service to retrieve data from AWS S3, FTP/SFTP servers, parsing and pushing alerts to emergency systems for improved monitoring.
- Worked on **graph db and algorithms to find and aggregate** content on content management system. Good understanding in Graph data structure.
- Engaged in feature development and bug resolution, maintained high application performance and reliability.
- Technology stack included Core Java, Spring Boot, JAX-RS, Dropwizard, Apache Camel, JUnit, Mockito, Cucumber, Neo4j, MongoDB, Kubernetes, Docker, RabbitMQ.

Software Engineer

Sasken Technologies, Bengaluru, India | Mar 2019 – Jul 2019

Developed a Python-based data extraction library and comprehensive data integration testing frameworks to improve system efficiency and reliability.

- Designed and implemented microservices testing using WireMock and JAX-RS REST services, ensured robust validation across multiple components.
- Delivered high-performance business applications from requirements through deployment, aligning closely with client needs.
- Utilized Core Java, Spring Boot, JUnit, REST APIs, Jenkins, and JIRA to build scalable, maintainable solutions.

Associate Software Engineer

Harman International Pvt. Ltd., Bengaluru, India | Aug 2017 – Mar 2019

Enhanced Android audio frameworks by developing test applications to identify and resolve audio performance issues, improving user experience.

- Contributed to R&D efforts for media and audio components within the Android open-source ecosystem, fostered innovation in mobile audio technologies.

INTERNSHIP

Intern

Harman International Pvt. Ltd., Bengaluru, India | Feb 2017 - Aug 2017

- Authored unit tests with JUnit, Mockito, and PowerMockito to ensure robust, maintainable, and high-quality code.
- Integrated JaCoCo and Clover into Gradle/Maven projects to deliver detailed code coverage reports for quality assurance.
- Developed CAN signal simulation tools to validate and test automotive systems for performance and reliability.

PERSONAL DETAILS

Date of Birth: 19th November 1990

Languages Known: English & Hindi

Address: Bangalore, India
